Although we don't endorse or recommend using hacks and mods of this kind, we are going to briefly mention some of them here, just so you know what's possible, and what's not.

In most cases, you will have to get the Pro-Pack, which will give you access to unlimited things and avatar customization (sneakers, cool hats, etc.), without cheating.

However, if you are an iOS user who wants even more than what you're getting with the Pro-Pack, then you'll need to jailbreak your iPhone or iPad to make it work.

On the other hand, if you want to access these Doodle Army 2 cheats and hacks on Android, you will only need to download the APK files and use a software application like toggle mod to patch and compile files.

That's not all. You may even have to edit the game's code using something like an APK Editor to get access to popular mods such as invisibility, unlimited ammo, and unlimited nitro.

So, to hack this game, you have to know how to code, and if you don't know how to do that, then why start now just to hack and cheat on Mini Militia?

## **Best Doodle Army 2: Mini Militia Cheats, Tips and Tricks**

Use this guide to become a master of the game, if you apply these tricks, hacks and techniques, you'll quickly become one of the best players in the world.

Certainly one of the deadliest and most feared players in the game.

### **#1**

If you're just starting out with the game, avoid facing off against advanced players because they will chew you up and spit you out within seconds.

You will get really frustrated, really fast, and you'll probably stop playing because you'll lose interest in the game almost immediately.

## **#2**

Reload your weapon constantly, especially if you're getting close to an opponent.

## **#3**

Use bombs when other players are attacking each other. Be very sneaky, I mean like ninja like sneaky, and then surprise them with a devastating bomb.

## **#4**

Make sure to fill your jetpack completely before launching an attack on your enemies.

Stick to this principle and apply it religiously, and you'll probably win all the time.

Ironically, this is perhaps one of the best kept secrets in Doodle Army 2, despite being so simple and easy to apply.

## **#5**

Use long distance weapons (Sniper) and zoom in to kill your enemies from far away, and also to avoid danger. But always keep a back up weapon in case you run out of ammo.

If you ever run out of ammo, having a shotgun would be ideal.

## **#6**

Use your fist to kill enemies when they're really close to you.

Taking enemies out with your punches is a lot faster than using a weapon to kill them when they're standing right next to you.

### **#7**

If you notice that you're facing modded players, leave the game immediately to avoid frustration and losing valuable points, as well as interest in the game.

### **#8**

Tap on the Zoom button on the upper left corner of the screen to easily and quickly locate your enemies.

### **#9**

Locate and position yourself near the health refill to get your health back up as soon as you get hit.

### **#10**

Stay close to your enemies while using mini guns.

### **#11**

While you're in a battle, always try to stay flying around in order to avoid getting hit too much. Being on the air decreases the accuracy of your enemies, so make sure to take advantage of this glitch.

### **#12**

Use two guns whenever possible, but don't forget to always carry a powerful gun with you.

### **#13**

Wield your shield to avoid damage by as much as 100%, but watch out for those powerful missiles and grenades, which can actually harm you even if you're using your shield.

### **#14**

Hide in the bushes and surprise your enemies with a powerful attack in order take them out quickly.

### **#15**

Place your grenades, mines, and gas bombs near the respawn points to get more kills, thus more points.

### **#16**

After playing online for a while, you'll earn a few points, use them to get a jet-pack and an extra life. Two very important things you'll need to get really good at Mini Militia.

### **#17**

If your life is getting low, you should try to kill yourself. By committing suicide, you'll prevent your opponent from gaining additional points.

### **#18**

Fire and use the melee attack at the same time. This will allow you to rush into your opponents and easily kill them even if they're using a shield.

Only perform this type of attack when your enemy runs out of ammo, otherwise you'll be the one who ends up getting wasted.

## **#19**

Use your points to get things that matter, things that will actually make a difference. In other words, spend in an intelligent way your hard earned skill points.

## **#20**

Avoid grenades like the plague, especially if you've been hurt.

Simply fly up as high as you can, as quickly as possible to get away from attackers, and you'll be OK.
